The Iridium Constellation of 66 cross-linked Low Earth Orbit (LEO) satellites, plus seven in-orbit spares means truly global coverage and real mobility everywhere.

The network is considered a meshed constellation of interconnected cross-linked satellites so that each satellite 'talks' with the other nearby satellites in adjacent orbits.

Unique to Iridium, this architecture provides inherent advantages in performance and reliability over other mobile satellite service providers.

GlobaFone has been an Iridium Service Provider for over 10 years so you can count on our knowledge and trusted advice. We provide Iridium phones, accessories and services to dozens of Federal clients and we can create a program that will help you achieve your results. Call us and let us help you with your Iridium requirements.

Iridium US 9505A

The rugged workhorse

With the Iridium 9505A portable handheld satellite phone, you can stay in touch across seas and time zones, in remote locations and on-the-go with one telephone number. Small, light and resistant to water, dust and shock, this phone is ideal for any explorer, ship captain, business traveler or emergency management team.

The 9505A allows its users to stay in touch virtually anywhere in the world, especially in places where landlines and cellular are non-existent.

US-made Iridium 9505A complete kit (For GSA contracts)

The Iridium 9505A satellite phone is the workhorse, the rugged satellite phone that militaries and governments worldwide rely on for dependable service. The standard 9505A went out of production in May of 2009 but the US-made phone is still available for agencies with special requirements. Keep in mind this is a complete kit:

- The satellite phone
- A rechargeable battery
- A wall charger
- The international plug adapters
- A car charger
- The auxiliary magnetic mount antenna
- The antenna adapter
- A phone case
- The user guide

Other providers will deliver your Iridium satellite phone to you in the original box - that means you have to unpack it and out it all together. What a hassle! Want to save yourself hours of time and aggravation? Buy your 9505A satellite phone from GlobaFone and use it straight of the shipping box. We'll do all the set-up for you:

- Unpacking the phone
- Charging the phone
- Inserting the SIM card
- Removing the PIN code
- Cleaning the phone
- Making a test call
- Packing it with all accessories in our padded nylon case

This is our value-add for you, saving you time and headache. This is critical when you have to deploy rapidly - there is no time to set up your phone.

Sensitivity	-117.9 dBm
TX Spurs General EIRP	-60 dBW

Iridium US 9505A

The rugged workhorse

KEY FEATURES

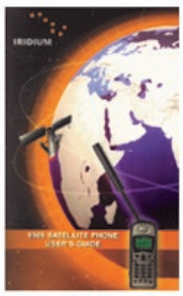
Once you select a service plan, you enjoy the convenience of one phone number world-wide. No roaming. No long-distance fees. No coverage maps. Simplified dialing, hands-free capability, two-way text messaging and optional Windows-based data capabilities, make this a tool users can rely on.

FLEXIBILITY

An array of optional accessories provides users with the flexibility to operate at maximum efficiency. Handsets, SIM card readers, Docking Stations and data kits can expand the voice and data functionality to multiple users.

INCLUDED

- SIM Card (choice of prepaid or post-paid platform)
- High Capacity Lithium-ion Battery
- AC Wall Adaptor
- International Plug Set
- DC Cigarette Lighter Adaptor
- Leather Holster
- Antenna Adapter
- Portable Auxiliary Antenna
- Hands Free Headset
- User Guide



Iridium 9555

The tough customer chosen by even tougher customers

Iridium 9555 is the latest evolution in our rugged and reliable satellite phones – and it works everywhere. Without exception.

When failure is not an option, the Iridium 9555 is the only option.

$1,205.00

KEY FEATURES

- Compact physical footprint for streamlined portability
- Intuitive user interface for out-of-the-box functionality
- Water, shock and dust resistance for unparalleled durability
- Enhanced SMS and email messaging capability
- Integrated speakerphone
- Headset and hands-free capability
- Internally stowed antenna
- Mini-USB data port

GF_IR9555

ANYWHERE IS THE NEW EVERYWHERE

Mobile communications can expand frontiers, create opportunities, and establish critical lifelines. But only when it works.

From distant rigs to pitching decks, baking deserts to frozen ice packs, the Iridium 9555 satellite phone can handle any environment. It is small but determined, sleek but industrial grade, easy to use but powerful. It is every bit as rugged as our previous handsets – still resistant to water, dust and shock – but streamlined and packed with innovative new features.

The Iridium 9555 is the evolution of trusted, reliable mobile communications.

And it is connected to the only truly global mobile communications network. So anywhere on the planet you need to be, the Iridium 9555 is always connected and backed by unmatched network quality and world-class technical support.

COMPACT POWER

The Iridium 9555 is not only the smallest phone Iridium has ever made, it's also the most powerful. With a significantly reduced footprint from our previous phone, more hand-friendly form factor, and aerodynamic features such as an internally stowed antenna, this sleek handset is designed to easily go wherever your customers do – including through your distribution channels.

Iridium 9575 Extreme

Iridium Extreme on Land

Iridium Extreme is the first satellite phone to integrate voice, data, GPS-enabled location based tracking services and a programmable SOS button in a single device. Designed to meet military specifications for durability, Iridium Extreme is ideal for government and military personnel, emergency responders, mining teams or users that require location based services for real-time tracking. Operating on the Iridium satellite network of 66 satellites in a near polar Low Earth Orbit (LEO) with cross-link architecture, the Iridium Extreme handset is ruggedized enough to meet your critical communications needs even in the harshest or most remote environments.

KEY BENEFITS

- Supports all Iridium voice, circuit-switched data and Short Burst Data (SBD) services in one compact, lightweight handheld.
- Seamless global coverage.
- Programmable GPS-enabled SOS button.
- Available for use with existing Iridium services.
- Track and monitor Iridium Extreme users in real-time from a secure web-portal featuring Google Earth and Google Maps.
- Ergonomic, ruggedized handset with highest Ingress Protection rating and military grade durability.

MOBILE VOICE CALLING AND MORE

- High-quality global voice service, with call forwarding and restriction options.
- One touch distress calls, text and email messages for emergencies using the programmable SOS button.
- Email and small file transfer via the Iridium RUDICS platform.
- View location and share it via SMS to either a pre-programmed "Quick GPS" contact or a new message contact.
- Wireless connectivity using Iridium AxcessPoint to establish a Wi-Fi hotspot.

When you need to leave your office just undock your handset and take it with you. Never be out of touch again

FEATURES

- RJ11 Connect—Connects to an analog phone or PBX
- Hands-Free Connect
- Data Port Connect
- Built In Antenna Holder
- IRIDIUM Certifiec
- WEB Connect

ADVANCED FEATURES

- **SMART DIALING**
- **SIMPLE OPERATION**
- **BASE STATION RINGER**
- **VERSATILE POWER INPUT**
- **MULTIPLE ANTENNA OPTIONS**

GF_IR_9505A_DCKST

$2,128.65

9505A DOCKING STATION

The solution for using your 9505 or 9505A Iridium satellite phone indoors and outdoors. Just dock your Iridium phone in our Docking Station and you can use satellite communications with standard analog phone sets or your company's PBX system. When you need to leave the office, just undock your handset and take it with you. ever be out of touch again! A military secure version is also available.

KEY FEATURES

- RJ11 Connect: Connects to an analog phone (single or PBX) including multi -handset wireless phones. Use of a cordless phone with expandable handsets can provide up to eight units within a two-mile range (unobstructed) from the base station.
- Hands-Free Connect: Headset/microphone jack offers audio enhancement circuitry to provide excellent voice quality.
- Data Port Connect: RS232 port for data connections including Internet connection with the Apollo Emulator.
- "Smart Dialing": The Docking Station knows the correct format for the country that is being dialed and places the call once the number is entered. Smart Dialing eliminates the superfluous "00" IDD code (no more international dialing sequence).
- Simple Operation: The Docking Station combines clear LED status lights with the Iridium handset's graphical display for setup, troubleshooting, programming, and operation.
- Base Station Ringer: Audible ringing to alert of incoming calls.
- Versatile Power Input: 10-32VDC input range supports power systems on most vehicles and vessels. An included power adapter (ISU-VADAC) allows 100/240VAC, 47/63 Hz operation.
- Antenna Options: Can be used with many antennas, including fixed-mast, mobile fixed mount, and mobile magnetic-mount models.
- Web Connect: Remote configuration and management using Ontec Web Services provides unparalleled enterprise-wide communication and data management services.

ACCESSORIES

Mobile Magnetic Mount Antenna

The magnetic-mount antenna adds functionality to you Iridium satellite phone experience. Affectionately called the 'hockey puck' it is heavier duty than the auxiliary antenna that comes in the 9555 and 9505A kits and more flexible than the fixed-mast antenna that you mount to a building or vehicle. Magnetic-mount and easy connection make this antenna highly desirable for situations where you need extra flexibility.

$177.87

GF_ANTCOM_MMAGM_ANT

9555 Antenna Adapter

GF_IRANTADAPT_9555

This highly versatile adapter comes in the Iridium 9505A satellite phone kit. If you lose it, you will need a replacement in order to connect your 9505A phone to any external antenna. Simply plug the adapter in the back of the phone, connect the antenna and you are live.

$47.94

Portable Auxiliary Antenna

This auxiliary antenna lets you use your Iridium 9505A or 9555 satellite indoors. Simply connect it to your phone and mount the antenna outdoors. The cable length is about 8 ft. Perfect for using your satellite phone in a car or small boat this antenna keeps you out of the elements when you need to make calls.

$47.94

GF_IRAANTADApt_9500_05_05A

ACCESSORIES

Fixed Mast Antenna

For use with the ComCenter, Docking Station, 9500, 9505 or 9505A Portable Phones to deliver exceptional reception performance for permanent in-building or marine applications. Designed for free air operation (no ground plane) and is hermetically sealed to withstand harsh nautical environments.

$206.32

THE GLOBAFONE DIFFERENCE

There are many providers offering Iridium phones and service, not only on GSA but on the web. As the satellite market has picked up momentum, most of these 'wanna-bes' have jumped on board.

GlobaFone by contrast has been an Iridium Service Provider for over 11 years. We've been providing service to Federal Agencies in times of crisis as well as for daily use. We have the experience you can rely on when you need communication that cannot fail you.

GlobaFone pools airtime for you which lowers your cost. Activate your first phone on one of our inclusive minute plans and the rest on Basic Service. Under this plan, ALL of your phones can use the airtime which greatly lowers your monthly cost and risk of those high overage rates. In addition, we can create a custom airtime plan, specifically suited to what you need. And if you don't know when you will need airtime in a given year, pay annually and your pool of airtime is available for your use *anytime* during the 12 months.

At GlobaFone, we make it easy for you to subscribe to exactly the service you need.
